N0CO2

PRESS RELEASE

From n0co2.org Plant Trees. Stop Global Warming

3 November 2022

Carbon Credits are transforming Nature Based Solutions

Having spent 4 years planting trees, n0co2.org is now moving to Nature Based Solutions using Carbon Credits.

As of 2021, around 1 person in 10 worldwide was living in extreme poverty according to the World Bank, hence living on less than \$1.90/day.

Potentially this can now change.

Planting trees creates a basic income for people who work on planting trees for organizations such as Eden Reforestation Projects.

Linking trees to Carbon Credits brings the potential to generate an income that can be shared between Investors and the local Community.

Subject to the future price of the Carbon Credits, this can produce an attractive return to Investors, and for poor communities living in extreme poverty, this flow of funds can be transformational.

NOTES TO EDITORS

About n0co2.org

n0co2.org to make it easy for people to take action to stop global warming by planting trees.

We have planted over 1,500,000 trees 🌳🌳🌳

We also make it easy for small businesses to go Net Zero, with an easy-to-use template and inspirational message about the opportunity for businesses to be green and be seen to be green.

Whether for business, Government, or to offset air travel, planting trees is still by far the lowest cost way to remove CO2 emissions. By incorporating Carbon Credits we are now creating solutions that deliver potentially high returns for Investors and life-transforming impact for local communities.

n0co2.org is a project of the International NGO Saving Our planet www.savingourplanet.net
